Summary

Seeking an opportunity to work in a dynamic environment that offers a greater challenge to enhance my skills, thereby directing my future endeavors as an asset to the organization.

An aspiring detail oriented UI Developer with professional experience as an UI Development intern - with strong programming skills and solid foundation on HTML, CSS and JavaScript with responsive design to build engaging web application interfaces. With added hands-on working exposure gained on modern technologies such as React JS and Node JS, to achieve optimized web performance.

<ul style="list-style-type: none">Replicated a Food Panda landing page, creating an engaging and interactive design to showcase platform features.Enhanced HTML design for layout and CSS for styling to ensure a visually appealing user experience.	

Projects

E-Commerce Website (Heaven Masala) – Built with HTML, CSS and Bootstrap Theni, TN
2024 - 2024

Developing and Designing Web pages using HTML, CSS and Bootstrap

- Designed a responsive landing page titled "Heaven Masala" featuring a hero section, comprehensive product features, and customer testimonials.

Multitasker Web Application – Built with React JS, Tailwind CSS and JavaScript Theni, TN
2024 - 2024

Developing and Designing interactive Web application using React JS, Tailwind CSS and JavaScript.

- Developed a comprehensive productivity web application with three key modules: Task Scheduler, QR Code Generator and Invoice Generator - to help users manage tasks, generate QR codes and create invoices in real-time efficiently
- Built with modular and reusable components in React JS to ensure code maintainability
- Implemented logic for real-time data updates and PDF exports across all modules
- Styled the application using Tailwind CSS for a clean and responsive UI

Recipe Box Website – Built with React JS, Tailwind CSS and JavaScript Theni, TN
2024 - 2024

Developing and Designing interactive Website using React JS, Tailwind CSS and JavaScript.

- Built a responsive Recipe Box website where users can explore meal categories and view detailed recipes.
- Using TheMealDB API, the app fetches meal names, ingredients, and instructions.
- I implemented state management with React hooks and styled the site using Tailwind CSS for a mobile-friendly design.

Certification(s)

Diploma in Computer Applications (DCA) — A Technical certification course completed via **CSC** (Computer Software College).

Certified UI/UX Frontend Developer — An hybrid Technical certification course completed through **Zhahi Tech Training**.

Volunteering

Zhahi Tech Training

Coding Tutor 2024 - 2024

Provided tutoring sessions for under-represented Team members who were interested in coding, during my Training period

- Helped colleagues & my fellow trainees gain fundamental understanding of coding, focusing on HTML and CSS.
- Encouraged creativity among co-trainees by showing them how to build their interactive websites.
- Promoted problem-solving skills through coding practice.

Strengths

Problem Solving

Identified and solved a reoccurring UI/UX issue, increasing application efficiency by 15%.

Teamwork

Successfully collaborative in a diverse team of 4, leading to the timely delivery of projects.
